

ENVIRONMENTAL POLICY

For iSURVEY Group the environment is an integral part of the way we conduct our business, and environmental protection is the collective responsibility of our business community and of individuals. iSURVEY Group applies a zero-harm ambition.

iSURVEY Group Commitment:

1. Conduct environmental risk assessments, to identify actual and potential environmental impacts and assess their significance.
2. Develop and maintain relationships with customers, regulatory agencies, subcontractors, communities and employees in our countries of operation with the aim to reduce current and future costs to the environment.
3. Develop emergency response plans to mitigate the potential environmental impact of incidents.
4. Train employees to develop their awareness and to ensure our activities including maintenance are conducted in an environmentally responsible manner.
5. Encourage initiatives to reduce the reliance on non-renewable resources.
6. Encourage employees to submit proposals that result in minimizing the negative environmental impact our operations can have.
7. Maintain focus on operating modern clean vessel solutions on projects.
8. Take active measures to avoid pollution and implement processes where reasonably practical to minimize waste production.
9. Reduce, reuse, recycle and dispose of products in an environmentally safe manner.
10. Report and analyse environmental incidents, identify root causes and action implementation.
11. Comply with internal procedures, standards and supporting documents applicable to the work.
12. Comply with legislation and regulatory requirements where ever we work.
13. Carry out audits and inspections on iSURVEY Group work sites and sub-contractor facilities as applicable.
14. Publish environmental performance to shareholders and interested parties as part of the iSURVEY Group commitment to Corporate and Social Responsibility.
