

iSURVEY

iNAV Remote

Remote control and monitoring of iSURVEY's online navigation operations

Set-up Diagram for iNAV Remote

All types of operations are based on a combination of our different iSolutions, including iNAV®, iSAFE®, iROV®, iMON®, iCABLE®, iMAP®, and iLINK™ to ensure both simplicity, as well as the use of well proven software. Remote Video and Remote Speech can also be made available.

Remote Online Navigation

The offshore installation is available onshore for Remote Configuration, QC and Planning & Presentation (Helmsman display), where live data from offshore is transmitted to shore. All navigation data can be replayed on request.

Remote Video

Multiple video streams offshore are selected and optimised for available bandwidth in a multi-viewer solution. The navigation screen can also be transmitted as a video stream in the multi-viewer solution. Historical video can, on request, be streamed using a video on demand (VOD) feature.

Remote Speech

Multiple solutions for remote speech can be delivered on request depending on existing vessel installation:

- VoIP (Voice Over IP)
- Clear-Com integration to existing vessel intercom
- RoIP (Radio over IP) interface to vessel VHF radio

Client Online Survey Portal

A web-based Online Client Survey portal can be accessed, allowing the viewing of online navigation and video, including monitoring of speech. On request, a full Remote Helmsman's display can be mobilised at Client premises to enable operation of the Helmsman display (view mode only).

Future Developments

Continuous development is ongoing, involving new available technologies as required.
